

APPENDIX: V

DOCUMENT NUMBER: NTSB Record 24

DATE OF DOCUMENT: Unknown

TOTAL NUMBER OF PAGES: 01

TOTAL NUMBER OF PAGES ~~WITHHELD ENTIRELY:~~ 0

TOTAL NUMBER OF REDACTED PAGES: 0

DESCRIPTION OF DOCUMENT: Chart titled "TWA 800 Main Wreckage Simulation"

This record consists of a one-page chart that was prepared by NTSB staff and used by the staff to display the position, over time, incorporating the radar data, of TWA flight 800 following the departure of the forward fuselage.

This chart was responsive to a prior Freedom of Information Act (FOIA) request made by the plaintiff. In the NTSB's response to the request, this single page was withheld in its entirety. Subsequent evaluation of the information contained within the chart resulted in a determination that the document could be disclosed in its entirety without the release of material exempt under the FOIA. An unredacted copy of NTSB Record No. 24 was released in the Vaughn index filed in CV 02-8708-AHM and is attached here once again.

TWA 800

Main Wreckage Simulation

fast simulation nose departure at 20:31:17.2
